

Wrapping it up!

## Part Contents

|   |     |
|---|-----|
| ■ <b>Preamble</b>                               | 545 |
| Dynamic Providers                               | 545 |
| A Core Library                                  | 546 |
| Goals   | 548 |
| ■ <b>Developing a Core Library</b>              | 551 |
| Windows Management Instrumentation Queries      | 551 |
| The Real Size of a File!                        | 557 |
| Searching for Files                             | 561 |
| A Miscellany of Utility Extensions              | 564 |
| <i>String Outputs</i>                           | 564 |
| <i>Converting a String to a Typed Array</i>     | 566 |
| Mutation of a Result Output Type                | 570 |
| File System Watcher, Observables & Observers    | 571 |
| Computation Expressions/Workflows - Overview    | 576 |
| <i>Asynchronous Composite Function Elements</i> | 581 |
| Core Functionality                              | 587 |
| <i>Project References &amp; Files</i>           | 587 |
| <i>Modules Overview</i>                         | 588 |
| <i>The Measures Module</i>                      | 594 |
| <i>The Files Module</i>                         | 596 |
| A File's Encoding                               | 597 |
| Uri Type Extensions                             | 597 |

|   |            |
|---|------------|
| The DiskFileInfo Structure .....                              | 599        |
| Supporting File Writing .....                                 | 600        |
| Implementing a File System Watcher as an F# Observable .....  | 602        |
| <i>The Web Module</i> .....                                   | 602        |
| <i>The Locator Module</i> .....                               | 611        |
| Verifying a Relatively Specified Disk-based File .....        | 612        |
| Verifying a Relatively Specified Web-based File .....         | 613        |
| Verifying an Embedded Resource .....                          | 614        |
| ■ <b>The XSettings Dynamic Provider</b> .....                 | <b>615</b> |
| Mapping XSettings Data .....                                  | 616        |
| Implementing the XSettings Dynamic Provider .....             | 621        |
| <i>Implementing an F# Observable and an Observer</i> .....    | 623        |
| ■ <b>Encoding &amp; Instrumentation</b> .....                 | <b>627</b> |
| Unicode Encoding .....  | 628        |
| <i>Big or Little Endian &amp; Unicode</i> .....               | 629        |
| <i>Visualising UTF-16 versus UTF-8</i> .....                  | 630        |
| <i>Multi-byte Unicode Encoding</i> .....                      | 632        |
| <i>The Impact of Using UTF-16</i> .....                       | 633        |
| <i>Encoded Byte Arrays &amp; Binary Serialisation</i> .....   | 634        |
| Refining the Instrumentation Assembly .....                   | 636        |
| Instrumentation Payload Enhancements .....                    | 639        |
| <i>An Xml Schema &amp; Style Sheet for ETW Payloads</i> ..... | 640        |
| <i>Developing an Xml Style Sheet</i> .....                    | 642        |
| <i>Modifying the Instrumentation Payload</i> .....            | 646        |
| <i>Event Parameter Templates</i> .....                        | 651        |
| ■ <b>Dynamic Provider vs Type Provider</b> .....              | <b>657</b> |
| Extending Core Functionality - Kernel Modules .....           | 658        |
| <i>The Statics Module</i> .....                               | 658        |
| <i>The Patterns Module</i> .....                              | 659        |
| <i>The Compose Module</i> .....                               | 659        |
| <i>Using Typed Quotation Expressions</i> .....                | 662        |
| <i>The Measures Module</i> .....                              | 668        |

|   |     |
|---|-----|
| <i>The Native Module</i> .....                            | 668 |
| <i>The Attributes Module</i> .....                        | 668 |
| <i>The Extensions Module</i> .....                        | 669 |
| <i>The Lookups Module</i> .....                           | 669 |
| <i>The Types Module</i> .....                             | 672 |
| <i>The Elementals Module</i> .....                        | 673 |
| <i>The FileFunctions Module</i> .....                     | 675 |
| <i>The Web Module</i> .....                               | 676 |
| <i>The WpfGraph Module</i> .....                          | 676 |
| The XResources Dynamic Provider .....                     | 677 |
| <i>Mapping for the XResources Dynamic Provider</i> .....  | 677 |
| <i>Implementing the XResources Dynamic Provider</i> ..... | 683 |
| The Manifest Dynamic Provider .....                       | 684 |
| <i>Output Types for Manifest Resources</i> .....          | 684 |
| <i>Wrapping the Manifest Wpf Repository</i> .....         | 685 |
| <i>Wrapping the Manifest Embedded Repository</i> .....    | 688 |
| <i>Wrapping the Manifest Resx Repository</i> .....        | 689 |
| <i>Implementing the Manifest Dynamic Provider</i> .....   | 691 |
| Testing the Kernel Library .....                          | 693 |
| Hybrid Providers? .....                                   | 694 |

## Accompanying Videos

|   |     |
|---|-----|
| 303. WMI Queries - Parts I through III. ....                          | 557 |
| 304. A File's Size - Parts I through III. ....                        | 560 |
| 305. File searching revisited - Parts I & II. ....                    | 563 |
| 306. Object Extensions .....  | 566 |
| 307. Convert a String to a Typed Array - Parts I & II. ....           | 570 |
| 308. Observables and Observers - Parts I through III. ....            | 576 |
| 309. Workflows and Computation Expressions - Parts I through IV. .... | 579 |
| 310. Workflow Parallelisation - Parts I & II. ....                    | 585 |

|  |     |
|--|-----|
| 311. Searching Files - Workflow vs Mailbox Processor . . . . .                             | 586 |
| 312. Core Library Modules - Parts I through IV. . . . .                                    | 588 |
| 313. The Core Measures Module. . . . .   | 596 |
| 314. The Core Files Module. . . . .  | 602 |
| 315. The Core Web Module - Parts I & II. . . . .   | 607 |
| 316. Dealing with Relative and Absolute Uris - Parts I & II. . . . .                       | 614 |
| 317. Mapping and Dynamic Fetching of an XSetting - Parts I & II. . . . .                   | 619 |
| 318. Implementing the XSettings Dynamic Provider - Parts I & II. . . . .                   | 626 |
| 319. Instrumentation changes and XSettings - Parts I & II. . . . .                         | 638 |
| 320. Event Parameter Cases, Templates and Xml Serialisation - Parts I through III. . . . . | 651 |
| 321. Overview of the Kernel Library - Parts I & II. . . . .                                | 658 |
| 322. Instrumented Function Evaluation. . . . .   | 661 |
| 323. Typed Quotation Expressions and Value Types - Parts I through IV. . . . .             | 668 |
| 324. The Kernel Lookups Module. . . . .  | 671 |
| 325. The Kernel Types and Elementals Modules - Parts I & II. . . . .                       | 673 |
| 326. The Kernel FileFunctions and Web Modules. . . . .                                     | 676 |
| 327. Mapping XResources for Dynamic Access - Parts I & II. . . . .                         | 683 |
| 328. Implementing & Testing Dynamic XResources - Parts I & II. . . . .                     | 683 |
| 329. The Manifest Dynamic Provider - Parts I through IV. . . . .                           | 693 |
