

Part Contents

■ Semantic, Structured Logging	59
Semantic Logging	60
What makes Semantic logs Structured?	61
<i>ETW Event Data Header</i>	61
<i>ETW Event User Data - the Payload</i>	66
■ F# as an ETW Event Source	69
Overview of Expected Header Usage	70
Quantifying Event Emission Permutations	74
<i>Constructing Events for the ETW Manifest</i>	79
<i>Mapping an Event to an Event Id</i>	82
<i>Specifically for F#</i>	84
<i>A Universal WriteEvent method</i>	84
An F# EventSource Class	85
<i>Concatenating Unions - Not Possible! Really?</i>	86
<i>Timing Processes</i>	90
<i>Implementing an Event Source</i>	95
<i>Inspecting the ETW Manifest</i>	100
■ The Event Payload	105
Some Small Code Changes	105
<i>Generic Attribute Extraction</i>	106
Serialisation	107
<i>An Overview</i>	108

<i>Implementing Serialisation</i>	109
<i>Serialising F# Record Types</i>	111
Implementing the ETW Payload	112
<i>The Origin Record Type</i>	114
<i>The Error Record Type</i>	115
<i>Additional Data for an Event</i>	116
<i>The Payload Serialisation Contract</i>	117
<i>Event Emission Parameters</i>	119
<i>The Payload Record Type</i>	121
■ Emitting ETW Events	125
An ETW Event Mailbox and Agent	125
User Instigation of an ETW Event	130
Testing ETW Event Emission	133
■ Using an ETW Event Sink	139
The SLAB Event Sink	139
<i>Event Level Filtering</i>	145
ETW PerfView	146

Accompanying Videos

207. Union and Attribute enhancements - Parts I through IV.	90
208. Duration timings - Parts I & II.	94
209. Constructing an F# EventSource - Parts I through IV.	99
210. Serialisation Considerations.	112
211. Implementing the Payload - Parts I through III.	122
212. Asynchronous event emission - Parts I & II.	130
213. User instigation of an ETW Event.	133
214. Running a test for ETW user event emission.	135
215. Using SLAB as an ETW Event Sink.	146
216. Using PerfView as an ETW Event Sink.	149
